## Verbal Description

Stamp fragment. top/bottom edge is notched, side edge is not.  
 Design is fragmentary, but looks strange to me - looks almost like a reverse  
 design - perhaps a mold? Doesn't have the curved edges associated with  
 figurine molds, but doesn't look quite right as a stamp.  
 Can see cut marks on the edges. Design side is burnt - burning goes 1/4 way  
 through the artifact. Potential dancing man.
